

Android Networking – WUSM-secure

***Before your device will connect to WUSM-Secure, AirWatch must be installed and activated.

**Make sure Wi-Fi on the device is turned on

*Please note that this might look different depending on manufacturer/model/Android OS version

From the *settings* menu, select **Wi-Fi**. Pressing this will bring up the screen you see to the right.

Selecting **Wi-Fi** will bring up a list of available wireless connections in the area.

Select **WUSM-secure**.

Leave the preconfigured settings in place.

When prompted to authenticate enter “pcf\” followed by your PCF domain username and password.

IF you have any questions or issues, please contact the PCF Helpdesk @ 362-9500.
